Contributing to the realization of a decarbonized society and sustainable growth

## Endorsement of TCFD recommendations and information disclosure

AEON DELIGHT CO., LTD. (Headquarters: Chiyoda-ku, Tokyo; Kazumasa Hamada, President & CEO and Group CEO; hereinafter referred to as “the Company”) has expressed its support for the recommendations of the TCFD\* (Task Force on Climate-related Financial Disclosure). The Company is pleased to announce that it has made a climate change-related disclosure in line with the recommendations on May 16, 2022.

\*TCFD (Task Force on Climate-related Financial Disclosures): established in 2015 by the Financial Stability Board (FSB) at the request of the G20. It recommends that the financial impact of climate change on companies and institutions be assessed and disclosed.

In order to achieve further sustainable growth, the Company is promoting ESG management, which is based on the Basic Policies for Sustainability established in August 2021, and which covers business, the environment and society. Among the 12 material issues that we have identified as our priority social issues for 2021, we have identified two items related to climate change: “Climate change and global warming countermeasures” and “Nature conservation and environmental impact reduction”. Under these circumstances, we expressed our support for the TCFD's recommendations and disclosed our "governance," "strategy," "risk management," and "indicators and targets" for climate change in line with the recommendations on our corporate website.

Disclosure based on TCFD recommendations :

<https://www.aeondelight.co.jp/english/csr/tcfid.html>

We will continue to extensively analyze the risks and opportunities that climate change poses to our business and reflect them in our management strategies, as well as proactively disclose information. In addition, we will further promote climate change initiatives such as disaster response and energy saving in our facilities, thereby contributing to improving the disaster resilience and decarbonization of not only our company but also that of our customers.

As a facility management company under our management philosophy of "We Pursue the Creation of 'Environmental Value' for our Customers and for the Local Communities" we will continue to make contribution to the realization of a decarbonized society and aim for sustainable growth.
